files. How to use this package:
2.Q: Make a new android
application that retrieves a
database from a server We have a
Oracle database on a server and I
want a free android application
that connects to the database on
the server via ODBC, and retrieve
some information. Is this
possible? Can I retrieve some
information from the database

without having an application? I want to have a database that's not connected to the internet, for example, the database will not be updated online. A: Android Application - Database Driven You need the web service (or a remote web server that supports Java Servlets) that will return to your Android Application the database data f678ea9f9e
